EXPERIENCE

Customer Success Engineer since Feb 2025

- Employee #13. Owned the customer experience through hypergrowth: 5k → 130k+ paying customers, ARR up 15x, and tickets 200 → 1,500+/week
- Built an AI support agent from scratch (intent, classification, tool use, and replies) with custom evals and benchmarks; resolves ~25% of conversations
- Cut resolution time by 70% and held first-response SLAs while ticket volume grew 7x, consistently at 2–4x the throughput of peer CSEs
- Closed the loop with Engineering through recurring deep dives, demos, and Feedback Friday, a weekly customer-feedback newsletter
- Shipped product code directly (rate-limit automation and support tooling) and helped hire and onboard the support team

Success Team Manager, Mid-Market May 2023 - Feb 2025

- Led a global CS team of up to 17 direct and indirect reports across 4 continents: 100% retention and 7 promotions in 12 months
- Owned ~80% of CS-covered accounts (\$40M+ ARR) at 115% team NRR, 130% on my own book
- Doubled Scale segment coverage with no added headcount through webinar programs and automation
- Built Next.js automations and Gong, Planhat, Slack, and Zendesk integrations saving 2,000+ team hours a year
- Automated account assignment with suggestions by region and book load, replacing a manual, Director-gated process

Customer Success Team Lead Jan 2022 - May 2023

- Led the Vitally → Planhat migration; coached CSMs to 120% team NRR while carrying the largest book among leads at 140% NRR

Customer Success Manager Apr 2021 - Jan 2022

- Managed 50+ strategic accounts at 145% NRR (vs. 110% target)

Manager, Growth Operations Feb 2020 - Feb 2021

- Built the Customer and Growth functions supporting an \$8M Series A
- Implemented a GTM stack cutting costs 60%, doubling activation rate, and halving time to activate through automated user journeys

Growth Architect Oct 2019 - Feb 2020

- Technical lead for Customer Experience and Monetization; ran messaging operations delivering 10M+ emails and 12M+ in-app messages a year

CS Specialist → Manager Aug 2018 - Oct 2019

- Migrated customer messaging from Intercom and Appcues to Customer.io; cut campaign deployment time by 85%
- Implemented ML-driven churn prediction, reducing churn by 15%

Earlier · Gameloft 2014 - 2017 · Built the email program from scratch to 500k+ subscribers, then led global product marketing for mobile launches (40M+ downloads)
